

Manakamana Treks and Expedition

Welcome to Manakamana Treks and Expedition

We are a family run business that has been operating treks and expeditions for travellers in the Himalayas since 1990. We believe in offering our clients the highest quality in customer service, and tailor each trek and expedition to the clients individuals needs. We are committed to the values of sustainable tourism and we intend to develop and improve our commitment to the community, employees, guests and the environment.

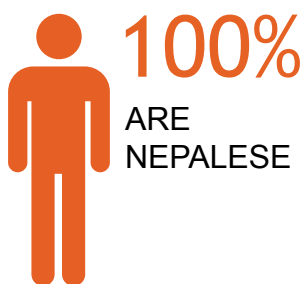

Issues Facing Nepal

Nepal's economy has grown significantly over the last few years, and the country now has the highest minimum wage in South Asia – although a quarter of the population still lives below the poverty line. Nepal has historically been a rigidly patriarchal society. Women are still underrepresented in the workplace and often employed in menial or exploited positions. Recycling is in its infancy and Nepal currently has limited facilities for recycling plastic materials.

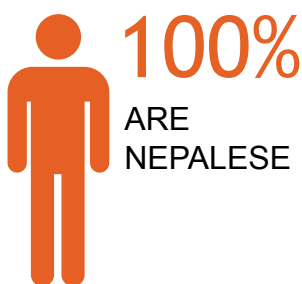

SOCIAL IMPACTS

We are proud of the excellent reputation our staff have achieved. They are experts at meeting the individual needs of each client, and provide the best services.
